FOR IMMEDIATE RELEASE

VECTOR SKETCH CELEBRATES ONE YEAR ANNIVERSARY

Audio visual services firm enjoys steady growth offering inventive outsourced CAD and design services

ST. LOUIS, MO - November 7, 2006 – Vector Sketch today celebrates its first anniversary in operation. Started one year ago today, Vector Sketch changed the audio visual industry landscape with its Computer-aided design (CAD), documentation, and engineering services.

“It’s been an exciting year so far,” said Adrian Boyd Vector Sketch’s President. “From our debut, to our presence at InfoComm it has been non-stop. Growing this new concept of skilled outsourced design and engineering services to the audio visual industry has been a rewarding adventure.”

“We would like to thank our existing customers for their support and business throughout this year,” said Boyd. “Our partnerships with these firms have enabled both parties to grow and take on new projects. We look forward to continuing our relationships and developing new ones as the year’s progress.”

To kick off its second year Vector Sketch is offering a 10% discount for new customers during the month of November. Vector Sketch also plans to further educate the industry with blog content and directed CAD tips and tricks.

About Vector Sketch

Vector Sketch is an audio visual design and consulting firm offering Computer-aided design (CAD), documentation, and engineering services to industry practitioners such as system integrators, consultants, and architects. Utilizing products such as AutoCAD, VidCAD, d-Tools, and Stardraw, Vector Sketch bridges the gap for small to large audio visual companies.
